

Important Note for XP Users:

1) If you run DWF your computer **with** firewall, you must open port 80 for incoming requests:

Start->System->Network and Internetconnections->Networkconnections->Properties->Extended->Properties->Webserver(Http)

If you run DWF in a network contact DWF inf@dwf.net for configuration details.

2) Make sure, you have full access to DWF program folder when you run DWF under an other then Administrator account.
